Analysis of Technology Adoption by SMEs Using Technology Organization Environment Model 18%.pdf
3 MB

Dear Editor,

I am writing to submit our manuscript entitled, "Analysis of Technology Adoption by SMEs Using Technology Organization Environment Model" for consideration for publication in Journal of System and Management Science". Along with this submission, we attach the script and similarity report in the attachment

Because our findings can be used as a reference in technology adoption in SMEs, it will most likely be of great interest to vision scientists, researchers, MSME management and lecturers who read your journal. This manuscript represents original work and is not being considered by any other journal. All authors agree to this manuscript and submission.

Thank you for receiving our manuscript and considering it for review. We appreciate your time and look forward to your response.

Best Regards
IGN Satria Wijaya

Dear Author,

Thank you for your interest.

Please note that as we do not have fundings for the journals from 2022, we have to charge the authors 700 USD (with 10% discount, which is 630 USD) from 2023, once the paper is accepted

Please let us know if you accept this policy or not. Then we will take the next step. Thank you.

Best regards,
Mincong

Dear Author,
Please check the comments and revise your paper, you need to submit the revised paper together with a detailed response to reviewers by Feb 21, 2023.
Thank you very much.
Best regards,
Mincong

Reviewer 1: revision is required

The paper is interesting and well written, I have learned something from reviewing your paper, however, I have to point out some minor rooms for improvement as follows:
1. Please double check the abstract and make sure the followings are done. the purpose of your study, why you did this research? the method you used in this study, what method did you use to solve your research problem? The results of your study, what have you got from this study? the implication of your study, what are the practical and theoretical implications of your study? I mean how can the results be applied to theory and practices. the values of your study, what's your contribution to theory or/practice?

2. In the introduction section, you should summarize the gaps of existing literature, then present you aim to do.
3. WHY did you put question marks on all the hypotheses? 'impact to' should be changed to 'impact on'.
4. You have provided quite some details about the research methodology, please check carefully and make sure other people can replicate your method.
5. I cannot see sufficient discussions of the practical implications on the results, please add.
6. Please provide some information about the limitations of your study. The conclusion part is too simple. Research directions also should be presented.

Reviewer 2: revision is required

The paper is interesting and within the scope of JSMS. I have learned something from reviewing this paper. However, I have some concerns for the authors to revise the paper:

- 1) Language is not good, you need to polish the whole paper after revision.
- 2) please format your paper. all the figures and tables are not well aligned, please reorganize them.

Dear Editor,

Through this email, we will send back the article that we have revised based on the reviewers' notes (the file is attached in the attachment). We have marked the revision points with yellow shaded areas. For the record, we will do proofreading after the revision process is complete.

Thank you for your attention.

Best Regards

IGN Satria Wijaya
